

# SMARTWAY TRANSPORT

## SMARTWAY TRANSPORT PARTNERSHIP

Smartway is a voluntary initiative created by the U.S. Environmental Protection Agency to help mitigate carbon emissions from rail and truck equipment.

As a SmartWay Transport Partner, we use SmartWay qualified carriers as often as possible. These carriers report emissions data and rely on energy-efficient equipment and strategies.

Shippers can become SmartWay members by committing to emissions measurement and reporting.

Visit [Become a Smartway Shipper Partner](#) for more information.

In 2022, TQL loaded 1,512 SmartWay Qualified Carriers, who traveled more than **236 MILLION+ MILES ON TQL LOADS**

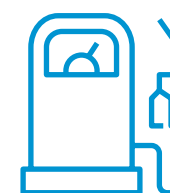

## GOALS OF SMARTWAY TRANSPORT PARTNERSHIP

Reduce air pollution and greenhouse gas emissions

Decrease operating costs associated with freight delivery

Improve truck and rail fuel efficiency

Strengthen freight sector
